

Route 263 Reconciliation - Conflict Report

Cycle: 2026-08-16 15:07:41 BST | 1 suspect 5 field conflict(s) 3 possible cancellation(s)

SUSPECT (quarantined - not resolved field-by-field this cycle)

bus YX74OJE -> Altrincham Interchange (final destination)

position: 53.4810, -2.2385
next stop: Charlotte Street (scheduled 15:12:00)
eta calc: 2.5 m/s over last 595s, 302m straight-line to Charlotte Street
why: 4/6 fields disagreeing simultaneously (arrival_timing, departure_timing, direction, start_time_date) - treating the whole observation as suspect (bad vehicle-to-trip match, gps fault, or genuinely disrupted service) rather than resolving each field independently this cycle
to clear: quarantined this cycle only - resolves field-by-field again once 3 or fewer of 6 fields disagree in a future cycle

FIELD CONFLICTS

bus YX74OJJ -> Altrincham Interchange (final destination)

position: 53.3885, -2.3471
next stop: Piccadilly Gardens (scheduled 14:11:00)
eta calc: next scheduled stop (Piccadilly Gardens) is 12527m away - too far to be genuinely 'next', tracking is probably stale

field:	start_time_date
--------	-----------------

live feed:	20260816 13:11:00
warehouse:	expected ~14:11:00
verdict:	FROZEN - MANUAL REVIEW REQUIRED
source:	confirmed

recon logic: frozen at last resolved value (3 cycles in review). start time drift -3600s
to clear: frozen after 4 consecutive conflicts - clears in exactly 1 clean CONFIRMED cycle (a clean ESTIMATED cycle alone cant clear it)

bus YX74OJT -> Piccadilly Gardens (final destination)

position: 53.4469, -2.3061
next stop: Altrincham Interchange (scheduled 14:40:00)
eta calc: next scheduled stop (Altrincham Interchange) is 7179m away - too far to be genuinely 'next', tracking is probably stale

field:	start_time_date
--------	-----------------

live feed:	20260816 13:40:00
warehouse:	expected ~14:40:00
verdict:	DATA QUALITY FLAG - flagged, no value picked
source:	confirmed

recon logic: start time drift -3600s
to clear: 2/3 consecutive conflicts so far - 1 more disagreeing cycle before this freezes; one clean cycle clears it back to normal right now

bus YX74OKA -> Altrincham Interchange (final destination)

position: 53.4540, -2.2988
next stop: Oxford House (scheduled 14:45:00)
eta calc: next scheduled stop (Oxford House) is 4456m away - too far to be genuinely 'next', tracking is probably stale

field:	arrival_timing
--------	----------------

live feed:	~+1370s
warehouse:	14:45:00
verdict:	FROZEN - MANUAL REVIEW REQUIRED
resolved:	+203s

Route 263 Reconciliation - Conflict Report

Cycle: 2026-08-16 15:07:41 BST | 1 suspect 5 field conflict(s) 3 possible cancellation(s)

source: estimated

recon logic: frozen at last resolved value (2 cycles in review). projected +1370s vs scheduled at Oxford House (3.0 m/s over last 613s, 1863m straight-line to Oxford House)

to clear: frozen after 3 consecutive conflicts - clears in exactly 1 clean CONFIRMED cycle (a clean ESTIMATED cycle alone cant clear it)

field: departure_timing

live feed: ~+1370s
warehouse: 14:45:00
verdict: FROZEN - MANUAL REVIEW REQUIRED
resolved: +203s
source: estimated

recon logic: frozen at last resolved value (2 cycles in review). projected +1370s vs scheduled at Oxford House (3.0 m/s over last 613s, 1863m straight-line to Oxford House)

to clear: frozen after 3 consecutive conflicts - clears in exactly 1 clean CONFIRMED cycle (a clean ESTIMATED cycle alone cant clear it)

field: start_time_date

live feed: 20260816 13:41:00
warehouse: expected ~14:41:00
verdict: FROZEN - MANUAL REVIEW REQUIRED
source: confirmed

recon logic: frozen at last resolved value (3 cycles in review). start time drift -3600s

to clear: frozen after 4 consecutive conflicts - clears in exactly 1 clean CONFIRMED cycle (a clean ESTIMATED cycle alone cant clear it)

POSSIBLE CANCELLATIONS (scheduled, never seen live, past grace period)

VJ2f21dcb20f4e892a0d0ee0... frozen at last resolved value (3 cycles in review). scheduled trip never appeared live, 87 min past scheduled start - possible cancellation

to clear: frozen after 4 consecutive conflicts - clears in exactly 1 clean CONFIRMED cycle (a clean ESTIMATED cycle alone cant clear it)

VJ56de83b9acdd56c43ce7a1... frozen at last resolved value (3 cycles in review). scheduled trip never appeared live, 117 min past scheduled start - possible cancellation

to clear: frozen after 4 consecutive conflicts - clears in exactly 1 clean CONFIRMED cycle (a clean ESTIMATED cycle alone cant clear it)

VJcab58e9e229b502de23e8a... frozen at last resolved value (3 cycles in review). scheduled trip never appeared live, 116 min past scheduled start - possible cancellation

to clear: frozen after 4 consecutive conflicts - clears in exactly 1 clean CONFIRMED cycle (a clean ESTIMATED cycle alone cant clear it)
